The Company

R. Alexander Associates, Inc. (RAA) is an environmental consulting company, specializing in composting and 'organics recycling' (e.g., anaerobic digestion, granulation/pelletization, etc.). RAA provides a full range of technical services (e.g., facility design and evaluation, systems & equipment selection, etc.), but is acknowledged as a leader in product market research and development, and is respected for its expertise in product development, quality issues and end use. It is also one of the most experienced companies in product labeling, registration and certification. RAA provides these services throughout North America, and internationally, and is known for its practical experience, creative solutions and overall understanding of the composting and organics recycling industry.

Major services include:

- Compost Market Research, Assessments and Development
- Organic Recycled Product Market Research, Assessments and Development
- Organic Recycled Product Sales, Marketing and End Use Education/Training
- Product Development
- Product Labeling, Registration and Certification
- Project Development Services (and Feedstock Acquisition)
- Production Facility and Marketing Program Audits
- North American Composting / Organics Recycling Industry Market Research
- Plus Other Services

RAA possesses over 25 years of experience working with a variety of organic recycled feedstocks and products. Let us put our experience and expertise to work for you.
